(54) AUTOMOBILE VANNING DEVICE

(57)Abstract:

PURPOSE: To provide an automobile vanning system that is able to fully open a front or rear part on a rear body in such a state that the front or rear part of a van is removed away, and to perform any cargo handling work (loading or unloading onto or from the rear body freely in all directions.

CONSTITUTION: A van 3 is divided into two front and rear slide bodies 4 and 5 being slidable in the longitudinal direction, and in this case, the slide body on one side is formed smaller than the slide body on the other, therefore the smaller one is made insertable into the other one.
